

DELTA DESIGN SYSTEM LIMITED

ENVIRONMENTAL & SUSTAINABILITY POLICY STATEMENT

A principal factor in the continued success of any organisation is the commitment to the Environment and continued Sustainability. At Delta Design Systems Ltd the quest for protection of Environment and continued Sustainability is ongoing, we will strive to constantly improve our management systems and in doing so assure our impact on the Environment and continued Sustainability is minimised in all company disciplines.

Delta Design Systems Ltd provide electrical and electronic engineering services related to electrical power generation and control, including project management, design, panel build assembly, test, installation, commissioning, service and maintenance .

We are committed to providing clear, understandable, and effective and technically sound solutions to client's perceived needs and problems and developing these relationships so that our clients feel confident with the advice and equipment provided is of the utmost Environmentally and continued Sustainability products we can possible supply.

The Environmental and continued Sustainability objectives are set at our regular management review meetings. These objectives are set with a view to improving our business and the data used to set them is acquired from a number of key sources within the business. These sources may include complaints, key performance indicators, new areas of business and customer feedback which are all reviewed and where possible incorporated into our improvement programme. Thorough on-going training of staff gives management confidence in service excellence and customer satisfaction. All staff are encouraged to have an active role in identifying improvements and this attitude will guarantee Delta Design Systems Ltd undertaking to promote the Environmental and continued Sustainability ethos in everything we do.

Delta Design Systems is committed to minimize solid waste generation and the potential release of pollutants into the environment first through source reduction, secondarily through reuse and recycling, and finally through treatment and disposal. The Organisation shall aim for continual improvement in it's environmental performance by the development, implementation, and maintenance of a documented Environmental Management System, that reflects the laid down key performance / policy principles of Delta Design Systems Ltd.

We will set clear and concise objectives including ensuring our compliance with legislation and other requirements identified (Appendix G) together with Aspects and Impacts (Appendix H) as part of our Integrated Management System that they are reviewed on a regular basis that will enable us to improve our business and the service offered to our clients.

We seek to achieve a consumer-oriented attitude to the way we run and plan our business for the future. Delta Design Systems Ltd assurance is given that our best endeavours will be used at all times to provide the best Environmental and continued Sustainability options of supply and service our customers deserve.
