Electronic & Electrical Engineering

DECEMBER 2007 NEWSLETTER

Does Your Fuel / Oil Storage facility comply with the latest regulations?

The enforcement of The Control of Pollution (Oil Storage) (England) Regulations 2001 came into effect on September 1st, 2005.

The regulations affect all industrial, commercial or institutional sites that externally store at least 200 litres of oil in drums, intermediate bulk containers or fixed tanks. (Also refer to Control of Pollution Act 1974 and the Water Resources Act 1991) Failure to comply legislation and best practice is a criminal offence, and could result in court proceedings and heavy fines, for which there is no corporate defence with fines of £20,000 per incident being enforced.

Don't Take Risks

We are expertly armed to thoroughly assess your fuel storage and delivery system, don't risk the heavy fines or the cost of clean up, should your system fall.

DDSL have the expertise to recommend conforming systems and install them as well.

DDSL technicians are fully trained and we can service and maintain all models of engines regardless of the age or make.

FREE NO OBLIGATION SURVEY
CALL 01255 830 355 Ex 213 / 215

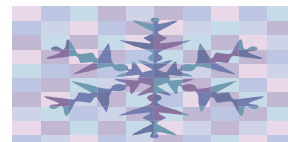

There are many types on the market to suit all applications and design specification

We hope you have find this update of interest should you require any further information please do not hesitate to contact us.
